DISCOVER ROBOTICS AT TRU!

Join us for an exciting day at Thompson Rivers University with the Engineering Department as you learn skills in robotics, compete in a robotics competition, tour TRU's Makerspace, talk with current software engineering students, learn about different engineering disciplines - and more!

Keynote Speaker: Lorelei Guidos, the first female to graduate with TRU's inaugural Software Engineering class and the Faculty of Science Valedictorian, shares her inspiring story and journey to being a successful Software Engineer.

APRIL 20th, 2024
10:00 - 3:30 PM

Students will have hands-on experience creating a working robot and learning robotic skills. While touring the Makerspace, students will have the opportunity to explore VR, make stickers, make buttons, test a 3D printer - and so much more!
